

THE ROSKAMP INSTITUTE
PROUDLY HOSTS AN
OPEN HOUSE
&
INFORMATIONAL SYMPOSIUM
FOR MILITARY VETERANS AND
THEIR FAMILIES AND FRIENDS
TUESDAY, NOVEMBER 8,
2011

Dr. Fiona Crawford will present a synopsis of her recent study of traumatic brain injury (TBI). Her recently published findings show how TBI can affect the brain's inflammatory mechanisms, changes in protein levels and cellular pathways, long after the original trauma. Dr. Crawford's work has been followed closely by the U.S. Department of Defense, because it could lead to better diagnosis of military personnel with mild brain injuries.

Location:

The Roskamp Institute
- a leading-edge research facility
for neurological disorders
2040 Whitfield Avenue
Sarasota, Florida (off 301)

TUESDAY, NOVEMBER 8, 2011
